These are high quality refurbished computers: All are in full working condition with no bad screen pixels but some signs of wear since they are used. The battery will hold a charge and is rated by the BIOS in low, moderate or normal condition. We receive them without hard drives, power cords, software and other parts. So we must charge the cost recovery fee indicated to cover parts, software, labor, warehousing and transport. We are a non-profit organization with mainly volunteers, offering the lowest possible prices to students and low-income people only, using a break-even model to sustain. Some revenue is used to give free computers/training for the homeless

Warranty: All computers are thoroughly tested and have a very low failure rate. We normally provide a 30 day warranty, but in the middle of the COVID-19 crisis, we are unable to offer any warranty and have discounted our prices to reflect that. Nearly every problem that gets reported is caused by user error, so find a tech-savvy friend. We are working from our Virginia warehouse and tech center to find a way to provide free phone support.

How To Order: During the COVID-19 crisis we do not have enough staff to answer questions or make deliveries. To place an order, email info@wildtech.org identifying the computer above you want or order and your shipping address. We only have what is listed, no changes. Limit one per person. We will reply back if the computer is still available and the FedEx Ground shipping date. The day before we ship we will email you a PayPal invoice, which you can pay by credit card or PayPal. Once paid, we will ship by FedEx ground. You should get it the next day.
